NEW CUMBERLAND, PENNA.

HOWARD V. WRIGHT

GREETINGS

In presenting the annual edition of **DISTINCTIVE GLADS** we wish to express appreciation to those who, through their patronage over the years, have made this catalog possible. We assure you that as in the past, we will continue to furnish you with high quality bulbs at reasonable prices.

Although we had a hot, dry growing season, by supplementing the rainfall by irrigation when needed, we were able to produce a crop of high quality bulbs. All stock was treated with new Improved Ceresan before planting. All bulbs have been treated with Spergon and D.D.T. after cleaning. Therefore, we believe you will be pleased with the bulbs which you purchased from us.

LOCATION

All mail should be sent to New Cumberland, Pa. **However, we are growing our bulbs on our farm located on Route 441 about two miles south of Middletown, Pa.** Those wishing to visit our fields during the blooming season should call at the farm. If you use the Pennsylvania Turnpike, get off at the Harrisburg East Exit and go toward Lancaster until you reach Middletown. Turn right on Route 441 in Middletown. The greatest number of different varieties will probably be in bloom during the period from August 15 to September 1.

CLASSIFICATION

With our description of each variety we indicate a three digit number in parenthesis. This is the classification of the variety for show purposes according to the schedule of the North American Gladiolus Council. The first digit indicates the size. The second and third digits indicate the color classification.

VARIETIES

In our opinion, each variety listed in our catalog has merit and is worthy of your consideration. As to whether you will like a particular variety may depend on your personal preferences and the purpose for which you wish to use the flowers. Remember that the price is not an indication of the quality of the variety. Newer kinds must of necessity be higher in price because of scarcity of stock. We suggest that beginners start with tried and true varieties in order to avoid disappointment. Growers of more experience and fanciers will want to try the newer ones.

KUHN AND KADEL VARIETIES

For the past several years, we have been growing and distributing the originations of Chester and Dorothea Kuhn in the United States. We are happy to announce that effective with the current year, we are growing and distributing the originations of Byron Kadel. This arrangement will permit Byron to devote all spare time to hybridizing and testing seedlings while we will assume the responsibility for growing selected seedlings until sufficient stock is available for introduction. Catalogers interested in obtaining stock of, or in listing Kadel and Kuhn varieties should write us.

Canadian customers should purchase from Willow Acres, Bowmanville, Ontario.

OUR GUARANTEE

All our stock is guaranteed to be healthy, vigorous, free from thrips, and true to name. **You must be satisfied.** If any stock is unsatisfactory, write us at once and we will try to satisfy you. If you like our bulbs and our service, tell your friends.

PLEASE READ CAREFULLY BEFORE ORDERING

All quotations are subject to previous sale. We urge that you place your orders early so that you may not be disappointed. Each year we are unable to fill late orders for a number of varieties. **No orders for bulblets will be accepted after April 1** as we expect to be planting bulblet stock by that time. **We do not care to accept orders for bulbs after May 1, except for mixtures**, as many varieties will be planted by that time. Orders are segregated as soon as possible after being received but will not be shipped until after danger of freezing is past, unless you request otherwise. However, bulbs can be sent any time desired. No substitutions will be made without your permission. If we are out of a variety you order, your money will be refunded unless you give us permission to make a substitution in size or variety. Cultural directions will be included with all orders.

ORDERS

Orders from the retail list amounting to \$2.00 or more will be prepaid to points in the United States. We prefer not to receive orders amounting to less than \$2.00. If such orders are sent, please include a fee of 25 cents to cover the cost of postage and packing. Prices as indicated in the quantity list are not prepaid, but are F. O. B. Middletown, Pennsylvania. If you wish to order part from the retail list and part from the quantity list, we will send the order transportation collect and will include extras or overcounts to make up for the transportation on the retail items. **WHERE ALL OR A PART OF THE ORDER IS FROM THE QUANTITY LIST, PLEASE DO NOT SEND MONEY TO COVER TRANSPORTATION COSTS. IT IS IMPOSSIBLE FOR US TO ESTIMATE THE COST OF TRANSPORTATION. PLEASE WAIT AND PAY THE TRANSPORTATION CHARGES WHEN THE BULBS ARE RECEIVED.**

Where a variety is listed at 2 for 20 cents or 2 for 25 cents, etc., please do not order a smaller number at a lower price. Five bulbs will be sold at one-half the price of ten, but no single item will be accepted for less than 20 cents except when so quoted. Where no 10 price is indicated, it may be found by multiplying the price of a single bulb by 8.

Where bulblets are sold by the packet, 25 to 50 or more will be included in each packet. We will give good value.

Do not ask for special quotations unless you have a large order. Our prices are very low for the high quality bulbs offered. However, we are glad to furnish special quotations to jobbers, growers, and others purchasing in large quantities.

DISCOUNTS

A discount of 5% in other bulbs will be allowed on cash orders from the retail list amounting to from \$3.00 to \$10.00. On such orders amounting to more than \$10.00 a discount of 10% in other bulbs will be allowed. These discounts do not apply to "collections," to items marked "no discount" nor to orders from the quantity price list. We also include worthwhile extras with retail orders. The value of the extras will be in proportion to the size of the order. Suggest varieties desired as extras. If we have sufficient stock we will comply with your request. However, new introductions and varieties marked "no discount" cannot be used as extras.

BULB SIZES

All bulbs listed as large size are $1\frac{1}{4}$ inches and up, mostly $1\frac{1}{2}$ inches and up, in diameter. Medium size bulbs are $\frac{3}{4}$ to $1\frac{1}{4}$ inches in diameter. Small bulbs are $\frac{1}{4}$ to $\frac{3}{4}$ inches in diameter. For the finest blooms, large bulbs are best. Medium size bulbs of most varieties will give nice cut flowers, but the spikes are not as long as from large bulbs. Although small bulbs of many varieties will bloom, others will not. The blooms from small bulbs will be noticeably smaller in size. Bulblets seldom bloom and are often difficult or impossible to germinate. We do not recommend them except to experienced growers.

1952 INTRODUCTIONS

FROM BYRON KADEL.

HOWARD V. WRIGHT. (Seedling X-48). (Spotlight x [Myrna x (Mamie x New Era)]). (410) Howard V. Wright is a light yellow with a somewhat deeper throat, just the shade of yellow which will make up well with lavender. It opens 8 five-inch florets with 5 more showing color on a 20 bud spike. The flowerhead is 29 inches in length. Its wide-open florets have plain recurved petals.

The plant is strong and vigorous with broad, deep green foliage. Bulbulet production and germination are excellent. It blooms in 82 days. This variety has demonstrated the ability to win at the shows and seems to have the qualities required for a successful commercial. In my opinion, this is a very fine variety. Seedling awards: 1949—"A" rating and best seedling, Keystone Show; 1950—"A" rating and runner-up for best seedling, Maryland Show. 1951 American Home Achievement Medal, Maryland Show; 1951 American Home Achievement Medal, Eastern International Show.

Price—\$5.00 each, any size bulb. 1 bulb and 10 bulbulets, \$10.00. (No discount.)

Growers Units—Unit No. 1—10 bulbs and 100 bulbulets, \$ 75.00

Unit No. 2—25 bulbs and 250 bulbulets, 125.00

Unit No. 3—50 bulbs and 600 bulbulets, 250.00

VOO-DUN-IT. (Red Penny x Voodoo). (490) The color is light mahogany shading through tan to a yellow throat. The form is somewhat similar to Voodoo. The clean unusual colors combine with the unusual form to make it a distinctive glad. The wide-open florets with heavy substance are quite ruffled and needlepoint. Its growing habits are very much like Voodoo except that it has a straighter, stronger stem. It opens 6 four and three-fourth inch florets with 7 more showing color on a 17 bud spike. It blooms in 70 days. It has been shown but twice. At Delaware in 1949 it won a blue ribbon in the 3 spike open class. At the Keystone Show in 1950 it was entered in the American Home Achievement Class, which was won by another Kadel Seedling, a pure white named Egret.

Price—\$3.00 each, any size bulb. 1 bulb and 10 bulbulets, \$6.00. (No discount.)

FROM DR. E. W. SISSON.

BLISS. (Green Mantle x Prima Donna). (541) Bliss is a ruffled, wide-open, bronze pink with a rose blush on a cream ground and with bronze shades in the bud. This is an entirely new shade. It opens 8 well attached blooms with 5 more showing color on a 20 bud spike. It makes a tall spike with a 26 inch flowerhead. Spacing and facing are excellent. Bulbulet production and germination are good. It blooms in 90 days. Shown as a seedling in 1950 and 1951, it has won a number of awards in Canada.

Price—\$3.00 each, any size bulb. 1 bulb and 10 bulbulets, \$6.00. (No discount.)

CAPTIVATION. (Elizabeth the Queen x Greta Garbo). (566) Delicate light lavender shading lighter toward the throat. It opens 8 five and one-half inch triangular shaped, wide-open, ruffled florets with 5 more showing color on a 20 bud spike. It makes a tall spike with a 28 inch flowerhead. It produces plenty of bulbulets which germinate 100%. At the C. G. S. Show at Oakville in 1951, it won first in the color section 3 spike seedling and in the 3 spike open classes.

Price—\$3.00 each, any size bulb. 1 bulb and 10 bulbulets, \$6.00. (No discount.)

FROM PERCY GREENFIELD.

MISS JOAN. [Belle of Quebec x (Greta Garbo x Margaret Beaton)]. (440) A distinctive blush pink without markings. It opens 12 beautifully waved and recurved blooms with 6 more showing color on a 20 bud spike. The spike is tall and straight with a 27 inch flowerhead. This variety blooms in 75 days and should make a valuable early commercial as well as a successful show flower.

Price—\$3.00 each, any size bulb. No bulbulets sold this year. (No discount.)

FROM W. F. HARDY.

GAILY CLAD. (Golden Frills x Ophir). (290) A unique green-yellow miniature with a conspicuous orange red-blotch on the three lower petals. It opens 5 heavily ruffled, wide-open florets on a 14 bud spike. The plant height is 40 inches. Bulblet production is medium. Germination is good. Because of the limited quantity of stock available, no bulblets will be sold this year and sales will be limited to 1 bulb per customer.

Price—\$5.00 each, any size bulb. (No discount.)

Canadian customers may purchase the foregoing introductions from Willow Acres, Bowmanville, Ontario, Canada.
